Prisoners of war. Letter from Coust von Brockdorff-Rantzau to M. Clemanceau:

German peace delegation, Versailles, May 19, 1912.

Sir: The German delegation has noted with satisfaction that the draft handed to it recognizes the principle that the repatriation of German prisoners of war and German interned civilians is to be effected with the greatest possible rapidity.

It is in accordance with the opinion of the German peace delegation that the task of setting the details of the execution of that repatriation should be entrusted to a special commission. Direct conversations between the commissions of nearly all the beiligerent states in regard to prisoners have been shown to be the best means of solving the difficulties, and it ought to be all the sasier at the present moment to clear up by vary discussion in a commission any divergencies of view or doubts in regard to cretain points.

### FRANCE IS REDUCING HER EXPENDITURES.

(BY CABLE AND ASSOCIATED PRESS.)

PARIS, May 22.—The government today introduced a bill in the Chamber of Deputies asking for credits of 12,948,886,526 france to cover military and extraordinary civil expenditures for the second six months of 1919 not included in the regular budget. The credits make a total for the year of 30,210,429,942 france, or 12,000,000,000 france less than in 1918.

Military expenditures for the second six months are estimated at 4,913,000,000 francs, which compared with the first six months means a reduction of nearly 43 per cent. The maintenance of troops in occupied German territory is set down at one billion france, or 150,000,000 less than the first six months.

NEEDS OF FLEET:

Three great national needs of the merchant fleet were outlined by Mr. Hurley as follows:

(1.) Maintenance of an American ocean mail service capable of covering the world. He said this would necessitate changing the law to permit compensating ocean carriers on a business basis, "bring it down from the realm of impracticability and make it apply to the sea-going units which we actually posses."

(2.) Establishment of a centrally controlled wireless telegraph service for promoting safety of life and property at sea and for giving American shipping and shipping interests the advantage of constant commercial information. Mr. Hurley said this service should be undercontrol of the may.

(3.) Adequate provision for training officers so that American ships always would go to sea in charge of American citizens.

UNION LABOR INQUIRES.

James O'Cennell, representing the American Federation of Labor, declared the laboring man wanted to know which would give him the best working conditions, government or private ownership of the merchant of the control of the seasons the Allied and secondaria powers cannot agree to be activated by a regularly-convened court-marginal. Under the Berne convention, however, the execution of the Sentenced to death, on June 11, 1913, to a consequence of the treaty, this murderer was fever as suspended until peace is suspended until peace is

at present."

Japanese competition especially was dwelt upon by Mr. Cantelow and he urged a study of the rapid growth of the Japanese merchant marine in recent years. He said the establishment of bunkering facilities and a free sone at Manila was needed to meet the competition of the British at Hongkong and of Japanese at Kobe.

# PEACE NOTES.

(Continued from Second Page.)

German prisoners of war and interned civilians should be returned to their homes in as normal condition as possible into the economic life of the country. That only appears possible—the precise settlement of the transport problems apart—if everything possible is physical state of those who are redone to improve the mental and turning home.

Having regard to the present situation in respect of economic existence in Germany, it must be admitted that Germany is unable to do with her ewn resources everything required in order to secure that end. This refers especially to food and clothing, therefore the German delegation thinks it desirable that the deliberations of the commission should likewise include examination of the question of the manner in which the Allied and associated governments might assist Germany in the solution of these problems.

The question arises, for instance,

always endeavored to supply the German government with all information in their possession on this subject, and they will certainly continue to do so after peace is signed. Concerning the care of graves, they would point out that articles 225 and 228 would appear to assure to the German people that the graves of their fellow-citisens shall be respected and properly maintained, and that, so far as is practicable under clause 225, the bodies of their soldiers and sallers may be transferred to their own country.

In regard to the German request for complete reciprocity, the representatives of the Allied and associated powers have to state that they feel it necessary to include Article 222, in view of the treatment which their own nationals have received while interned in Germany durins the war. As there was no parallel between the treatment which was accorded to prisoners of war by the German government on the one eide, and the Allied and associated powers are ready to do everything possible to repatriate German prisoners of war by the German prisoners of war and interned civilians properly fed and in good condition after the conclusion of peace. They regret, however, that the present demands on them from the German yoke, as well as from their own nationals, will probably make it impossible for them to supply the prisoners of war with clothing, etc., for which the German delegation asks.

Mr. Anderson is unquestionably, not only one of the best known but one of the most popular men that ever held public office, in the "Lone Star State." After serving as Deputy Sheriff of Harris county for twelve years. Mr. Anderson was elected Chief of Police of the City of Houston. He had occupied this office only a short time when the Sheriff of Harris county died. Mr. Anderson's friends persuaded him to make the race for the unexpired term of Sheriff to which he was easily elected. He was honored with re-election seven times and served the people in this important office for fifteen consecutive years. Four years ago, Mr. Anderson declined re-election and retired to private life. NORTHWESTERN BURKBURNET

# The Jaggers-Wallace DIVIDEND

THE DIVIDEND NOTICE of the JAGGERS - WALLACE OIL CORPORATION which is being published from Maine to California created just as much a those familiar with Burkburnett stocks as did the BURK-WAGGONER in a gusher and stockholders who paid \$75 for their stocks were paid \$3,333.33 for t shares. One share of BURK-WAGGONER cost one of our clients \$75 and he received \$3,333.33. There has been no GUSHERS to create a sensation for JAGGERS-WAL LACE, but in a quiet way this Company during the past year have been getting production. They have been accumulating valuable property. This Company paid \$330,000.00 in cash for their interest in Block 101 with three producing wells. They have since brought in another well which brings their production in Block 101 up to approximately 2,500

We learn from an associate that they paid \$95,000 for the FIVE ACRES in Block 86 and the TWENTY ACRES in Block 71 and this was before the fancy prices were paid in

JAGGERS-WALLACE has 102 acres in the RANGER FIELD surrounded by pre duction. They have one well producing approximately 600 barrels daily.

They will have another well in the Ranger Field in production within the next fifteen days and within the next fifteen days will have another well on the sand in Burkburnett.

Their production today is 3,000 barrels daily at least, which means \$6,000 NET IN CASH DAILY OR \$180,000 A MONTH. This production, will be increased monthly and as a prominent Arizona man said within three months they should be producing 7,500 barrels daily.

# The Dividend Explained

We have received wires asking for an exact explanation of the Company dividend an nouncement: It is perfectly plain to us. If you own 100 shares of Jaggers-Wallace now, or if you own 100 shares up to May 30, 1919, you will receive from the Company an additional 100 shares. THAT'S YOUR STOCK DIVIDEND. You will receive also on June 1st a cash dividend of Ten per cent. This cash dividend is an extra additional divident to the Company's regular 20% cash dividend. After June 1st you will be a stockholder of record for 200 shares and when the next dividend is paid you will receive a cash dividend on the 200 shares

We are reliably informed that the Company will pay after June 1st dividends monthly and if their production is held up to 3,000 barrels, and in our mind the production will be increased, the dividend will be 10% monthly instead of 30% yearly.

We have announced that your order for stock should be registered with us by Tue-day, May 27th, in order to absolutely assure you of your becoming a stockholder of re-ord. We as BROKERS want to see you on the books of the Company before June 1st. If you wire us your reservations we will immediately notify the Company, whose head office is at Fort Worth, Texas, that we are reserving so many shares for you, with the idea of your taking advantage of this dividend.

### LOCAL JEWS PROTEST.

A public mass meeting of all of the Jews of this citx, together with all the gentiles who care to join them, will be held Sunday afternoon. June 15, at Clune's Auditorium. The mass meeting is called for the purpose of making a formal protest against the atrocities which it is said have been committed against the Jews if Poland and other European countries.

As a preliminary step toward securing aid for the Jews in Europe, the local Jewish organizations held a meeting vesterday and sent a long cable to President Woodrow Wilson, at Versailles, France, calling on him in the name of the American people, to do whatever he can to correct the abuses being practiced in Rumania and Poland against the Jews.

### A GREASY, PIMPLY SKIN, COATED TONGUE AND FOUL BREATH

Poisons in the blood, accumulated through the winter months should be promptly driven out by taking sulphur, cream of tartar and molasses, but it is so nauseating! Well then, just get a tube of Sulpherb Tablets, and they will do the work pleasantly. They are made of sulphur, cream of tartar and herbesugar-costed tablets. Stomach, liver, bowels and blood are all benefited by their occasional use. Greasy skin, pimples, coated tongue and foul breath tell you if your blood is bad. Mrs. B. Clarke, 965 Main st. Buffalo, writes: "I have been using your Sulpherb Tablets and like them very, very much." Sold by all druggists. Don't accept ordinary "sulphur" tablets and be nauseated and disappointed.

COMPENSATION ACT

SIGNED BY GOVERNOR OPINION OF ATTORNEY-GENER AL HOLDS IRRIGATION BILL IS DEFECTIVE.

SACRAMENTO, May 22.—Sen Carr's bill making sixteen amments to the Workmen's Compe tion Act was signed today by Go Stephens. The principal change mad Stephens. The principal change made by the amendments was to reduce the waiting period before benefits begin under the provisions of the act from ten days to seven. Another amendment provided that dependency should begin with the date of the injury suffered by a workman, instead of at the date of death, as now provided.

U. S. Webb, Attorney-General, in an opinion received today by Gov, Stephens, held that a bill by Senator Irwin, passed by the Forty-third Legislature, to permit private irrigation companies to sell surplus wafer to others than stockholders without coming within the purview of the public utilities act, contained "defects" that would "open it to successful attack as to its constitutionality."

Mr. McNab is now suing Mrs. Stocker for \$75,000 for allered unpaid services for three years at \$25,000 a year. Francis J. Heney, who represents Mrs. Stocker in the defense of the McNab suit, was present in the courtroom yesterday.

After telling of hiring Mr. McNab as her general manager in 1914 at Venice, Mrs. Stocker was asked by Attorney Edwards for Snyder to state what Mr. McNab did during the first three years to earn his salary.

and Anderson announced them-selves satisfied, and that they would allow the case to be conducted by Lieut. Baird as he saw fit.

UGLY STORY.

Two ownen, wives of army officers, two men, two army officers, not their husbands, two civilian men and another woman, are implicated in the case, according to the story given to the authorities. The names of the army men involved are withheld, but the names under which some of the principals in the alleged scandal were registered throughout the country were made public in the course of the Sheriff's investigation.

At least seven persons are alleged to have made up the party which traveled, singly and at times together, from a point east of Chicago to the Paolife Coast, and then back to a place near Albuquerque, before the army investigation broke up the combination.

At the present time, Los Angeles investigators were told, four confessions have been forwarded to the army officials interested in the case, and at least four arrests made, including that of Wright.

Wright was taken into custody by Lieut. Baird in a sanatorium back of Pasadena, together with another man who gave the name of Clint Cheek, who was later released. Wright's release, it was understood, was made after he had made his statement and had promised to appear at the court-martial, when called.

The three women and four men involved are charged by the agmy officers with having gone on a protracted "joy-ride" which lasted four months, and covered most of the country. The party gathered through some prearranged understanding, and went to Chicago, where they stayed ten days. One of the members of the party was a wife of a major, just returned from France. Another officer, said to be of even higher rank, figures in the case.

From Chicago the party wont to Kansas City, thence to Denver, Portland, Seattle, San Francisco, San Diego, to Arisona and New Mexico. The pursuit by the army officer men busy.

Two of the persons involved in the alleged "joy party" are now at the Hotel McAlpin, New York, and the others' whereabouts are known. One of the women now lives in Los Angeles. Two were registered at the Hotel McAlpin, New York, and the o

The Harris agency has been watching for the woman for several weeks, it is said, as she is alleged to have cashed numerous checks for amounts ranging from \$15 to \$50, in practically every Broadway department store.

Another angle which is pusciling the police is the fact that she has kept rooms in two first-class hotels for the last nine monts. At each place Mrs. Davis bears an excellent reputation.

DISCORD AND HARMONY.

Paderewaki, prince of plantsts and Premier of Poland, has made a hurried visit to Paris for the purpose of asking to be released from his promise not to wage war against the Ukrainians during the armistice. Paris dispatches aver that the Ukrainians have been less concerned about keeping their promises than the patriotic Pole, and that they are taking advantage of Poland's inactivity to occupy valuable industrial territory that the Peace Conference awarded to Poland.

Will only release one mand he will lick Ukraina with that. But the rest of the world would be sorely disappointed if this eminent Pole, whose harmonies are famous, should make his debut in the European concert by striking a discordant note.

No JAZZ IN FT.

One notes with interest the statement of the Association for the Betterment of Public Service that it expects to put some red fire into the municipal election. Also one observes with sympathy the efforts of the faithful headline writers to make people believe that this or that candidate is conducting a "whiriwind campaign." But the red fire is mighty slow in igniting, and the whiriwind is a poor imitation of a rushing or rotatory movement. Truth to tell, there's no lazz in the contest. It is to be hoped that the voters will rouse themselves to their duty on election day. Particularly should the Republicans not fail to go to the poils and mark their ballots for Fredric T. Woodman for Mayor. The Democratic attach first importance to winning this city and it is urgently desirable that the Republicans drown them in a deluge of votes for Woodman.

SAPETY FIRST.

A San Francisco dispatch relates that one T. W. Osgood has been appointed "Assistant State Superintendent of Safety for the Los Angeles district." It is gratifying to know that the Los Angeles district, whatever it may be, is to be properly equipped with an animated safety-first device. But The Times admits that the public-safety commission is one of the forty-odd fats that has hitherto escaped detection. We have a compilation of State departments and commissions that fills more than forty printed pages; but no department of safety riuted pages; but no department of safety a listed there.

Bo we are left for the time being to spec So we are left for the time being to spec-ulate whether the arfety department is a commission, equipped with pins, that pre-sides over the shopping district and makes certain that women's gowns are property adjusted when they appear on the streets, whether it has something to do fith regu-lating the speed of automobiles, whether it is connected with the inspection of office-and factory buildings or it is an unlisted department of eugenics or a branch of the Blue Sky Commission.

But this much is assured: it has a su-

But this much is assured: it has a superintendent—who probably gets \$5000 a year—for the assistant gets \$3600. And the superintendent and assistant necessitate a long list of deputies and assistant deputies.

There are more commissions on the State pay roll than fleas on a dog.

THE PRESIDENTS NOTIONS ABOUT

If President Wilson had devoted as much of his intellectual energy to the study of economics as to map-making and historical research he prohably would not have fallen into the popular but fundamental error of referring in his latest message to the antagonisms of "capital and labor." Ernest tagonisms of "capital and labor." Ernest Renan once wrote that governments have been overthrown and nations wrecked by an unhappy phrase. The President's predilection for generalization and phrase-making has led him to the use of a term which gives a wrong conception of the industrial problems by which all the peoples of the world are confronted and that has given hirth to false decirines.

hirth to false doctrines.

Capital and labor are not and cannot be antagonistic; for it is by labor alone that capital is created; labor is an energy and capital represents accumulated energy. Labor is the dormant force of the waterfall and capital is the electric power generated by the intelligent application of that force to industrial uses. But the electric power is as valueless as the waterfall until opportunity is effered for its use in creating new energies which in themselves are causes producing the endless chain of effects that become parts of the intricate and compilicated machinery of modern industry.

For labor to rail at capital is for the waterfall to quarrel with the turbine, whose early function is to amply its latent energy. Labor has no quarrel with capital, and its dustrial disputes do not arise between "labor and capital," but between the men and women who are the generators of labor and the employers who seek to employ that labor to supply the necessities and luxuries of modern society.

President Wilson says: "We cannot go

of modern society.

President Wilson says: "We cannot go any further in our present direction. That road has turned out a blind alley. It is no thoroughfure to real prosperity. We must find another leading in another direction and to a very different destination."

Every attempt to generalise leads to con-fusion. The employer can pay no more for the labor going into the production of an article than the article itself will sell for in the markets of the world. The laws of supply and demand cannot be abrogated, even by the most powerful government that humanity has produced.

humanity has produced.

But the success of every industrial undertaking depends upen the cooperation of employer and employed. They must work as partners, actuated by the same aptrix and seeking the same end. A discontented workroom will wreck any industry. A relation exists which governments may destroy, but cannot create. Every competent employer recognises the right of his workmen to organize for their mutual protection and betterment; he recognizes their right to strike when disastisfied with wages and working conditions. The employer who falls to recognize these rights is quickly forced out of business or into bankruptey.

'There are other conditions which the workmen must recognize if they are to find profitable employment. They have a right to throw down their tools when disastisfied with their employment; but they have not with their employment; but they have not the right to wreck the property of the em-ployer or to use violence to keep others from picking up the tools they have thrown down. There is no defense for violent la-bor-unionism. When a workman quits his the right of standing by and forcibly pre-

There are lines in the President's message which may be construed as advocating some kind of government interference by which the employer would not be permitted to conduct his business in his own way be obliged to unionize his shop. The employer has the same right to employ whom he desires for service in his establishment he desires for service in his establishment as the workman has to quit work when he is dissatisfied. These are natural rights, as immutable as the laws that hold the planets in their orbits. The government will find itself quickly at the end of the "blind alley" and butting against a clift that tries to abrogate them.

The Times cannot agree with the President that "we cannot go any further in our present direction." It is the path that has given to the United States the greatest in dustrial prosperity the world has ever known; the path that has led the workmen to the highest wages and the best working conditions in the history of industry. We challenge the President to point to any other period when prosperity was more generally diffused and when there was a lesser The Catalogue and the Crop.

degree of poverty and misery. Surely that is not a path to be lightly abandoned.

We freely admit that conditions are not yet idealistic. There are gross accumulations of capital that are withheld from industry and there are honest and capable workmen out of employment. These are conditions that have come down to us from past ganerations and the work of centuries cannot be undone overnight. But the whole tendency of modern industry is towards their amelioration. Every successful industheir amelioration. Every successful indus-try is now working on some form of profit-sharing with its employees. Their pay is regulated according to the profits of the in-dustry; they are in fact as well as in the-

dustry; they are in fact as well as in theory pariners, employer and employee. The
spirit of co-operation is spreading and the
results are already visible. But all that is
to be found in the old path.

The President happily has discovered
that 'The genius of our business men and
the sound practical sense of our workers
can certainly work such a partnership out
when once they realize exactly what it is
they seek and sincerely adopt a common
purpose in regard to it." And we suggest
that the President and Congress will do
well to leave that solution to Industry itself, and not hamper progress with restrictive decrees drawn badly, although with
good intent. The President must have
learned by this time that experienced men
know much more about certain lines of industry than politicians; and that a governmental policy of hands off is generally more
successful than an attempt to inject politics ssful than an attempt to inject politics

DACIFISTS WITHOUT SHAME.

The cause of equal suffrage in the United States is not likely to be advanced by the fulminations of Jeannette Rankin, former, first and only American Congressweman against the peace treaty. Mrs. Ran-kin voted against the declaration of war while a member of Congress. Beaten for re-election, she has carried her opposition to our national policy to the extent of taking an active part at a recent woman's congress in Zurich, Switzerland, in accuring the adoption of a resolution denouncing the peace treaty as "a violation of the principle of justice and a continuation of the rule of

German and Austrian sympathizers succeeded in getting Mrs. Rankin and Mrs. Philip Snowden, wife of the English unionlabor leader, who lost his seat in Parlia-ment by reason of his pacifist activities, to pull the German chestnuts out of the fire. A cabled report of the congress says that the resolution denouncing the treaty was moved by Mrs. Snowden and seconded by Mrs. Rankin. The resolution recites in one of its whereases that the peace terms "are entirely in the interests of the enemies of the Central Empires."

And what, pray, did this American woman and this English woman expect? Because they are deaf to the call of patriotism and blind to the horrible atrocities of the Hunblind to the horrible atrocities of the Hun do they imagine that the sight of the tens of millions of widows and orphans in America, Great Britain and France—and the milions of maimed men-will permit the Allied peoples to forget the perpetrators of these crimes and make no provision for reparation and protection? Having lost neither husbands nor sons in the war, are hey concerned more about the abstraction of certain pacifists than the nameless crimes committed by the troops of the Central Er pires against members of their own sex?

cupled the utterances of this ex-Congress woman receive an attention that they do ot deserve. The Times is loath to believe that any American woman could condone the crimes of the Huns. To find this woman, who once sat as a member of Congress, now in effect playing the game of our beat-en enemies is a shock. We trust that in sending the next woman to Congress a better selection will be made.

Local grown vegetables are still high in price in spite of the great supply. Who has withdrawn them from circulation?

E According to the available authorities the habit of canning fruits and other per-ishables did not materialize until 1810, when thappeared extensively in France. Possibly this was anticipatory of the canning of Napoleon, who was given quite a jar a few years later. But be that as it may, the caning industry had no real status or importance in the world until the air-tight glass jar was invented and marketed in America. was for nature to reproduce her works in-definitely and the canning custom was quickly established in almost every house-hold. We have canned music and the canned drama. Likewise almost everything that is either catable or drinkable is put up in glass or the for preservation or convenience. The canned cow gives milk in the midst of the desert. With a canning factory and a cold-storage plant the ephemeral products of the tropics may be kept untainted and wholesome from year to year. The tin caus that are emptied and thrown at barnyard cais every month would make a pile thrice the height of the great pyramid. Millions upon millions of dollars go each year into the manufacture of these tin or glass containers, and one industry tin or glass containers, and one industry has developed more than a score of tribu-tary ones until the fields of endeavor extend from the polar seas to the tropical jungle. Even a modern war is chiefly reliant upon the canning industry for strength to main-

BOLSHEVISM AND DEMOCRACY.

essed in the text of a Constituries ago. In our own history it has stood the test of war-external and internal. It has survived the more ifficult trial of an invasion in peace, an invasion of representatives of every race and every nation, most of them alien in speech, foreign in hab-it, and ignorant of all our institu-tions. Unlike autocracy, democracy is not a thing apart from the people, not a superiostrument that insures the own successful operation. We

not a superinstrument that insures its own successful operation. We have to remember that democracy is not in Washington, but in our own hearts. That is at once its strength and its weakness. It is good as the people are inclined to value it—and serve it. A constitution or even an elaborate act of laws can by themselves insure but little. Other countries have constitutions as fine as ours, with guarantees of liberty not less emphatic, yet few Americans would be content to tolerate their conditions. Words cannot make a people great or a government just. Only constant patriotism and loyal service can do that. This one thought we must keep in mind when we speak of the aplendor of democracy. Each citisen in some degree carries its fate in his hand.

Better than any country we do carry out our constitutional provisions which provide two things especially. One is that ours be a government for all kinds of people without special privilege for any class—noble or commens millionaires, bourgedisis or proletariat. The other is that the majority shall detarmine the instruments by which this government of equal justice and equal opportunity may operate. The instruments are the laws and those who make and execute them. In these two respects democracy differs sharply from Bolshevism, Bolshevism professes to govern for a single class—the proletariat. This is a new autocracy. An autocracy is always bad, whether it be clothed in rags or garbed in velvet. Belshevism, moreover, has never given evidence that it believes in government for the majority, for it has not permitted an assembly of the people. Doubtless it will pegmit the majority will agree with the Bolshevish. Bolshevism is to be condemned quite aside from its practices as we know them. What are these practices? Our own government hap unbility of the people. Doubtless it will pegmit the majority will agree with the Bolshevish when the majority will agree with the Bolshevish when the majority of Brest-Litovak.

Let it be understood, however, that it is not these crimes al

Babe Pinelli opened proceedings by drawing upon Dawson for a walk. Middleton followed with a shot to Mitchell which the blond-haired whis accoped neatly and tossed to Bob Fisher. forcing Pinelli. dieton going to third, Wolter flew to Mitchell. Came then the mighty Griggs and Dawson pitched up three for a count of two and one. The next one was right in the alley and Art smote it upon the seam. The ball' shot sharply into right, up against the boards, and both Middleton and Eldred registered. McGaffgan struck out.

In the first half of the second canto Bob Fisher crashed three swats into the ozone, then went to the ice bucket. Borton drew a walk. Beck went out. Orr to Griggs, and DeVormer whifed at three and sat down.

Orr opened Sacramento's semi-period of the canto with a spankering double over short. Fisher singled past Borton and Orr came to the plate, Piercy sacrificed Gustavus Ding Dong to second. Pinelli followed with an out, Fisher to Borton. Came then Roy Middleton with a driving grounder that shot past Zin Beck like a Poilu seventy-five, Fisher skimming across the plate with the fourth and final marker-for the dauntiess crew of Strapper Rodgers, for Brick Eldred, following, next grounded out by the Mitchell Borton route.

In the following canto Bill Essick trotted Lefty Ross to the hill, and the port-side heaver held the local sluggers to four scattered safe blows for the remainder of the performance.

Fatty's hired men, put the first Vernon tally over in the third without a semblance of a safe bingle having been poled off Piercy's delivery. Dawson went out, McGaffigan to Griggs and Mitchell fiew to Eldred. Chet Chadbourne then worked handsome William for free transportation. Whereupon the Piercy person got excited and heaved a wild one which Gus Fisher could not have collected into safety with a crabnet, Chadbourne going to second on the weird stuff. Came stumpy Edington with a blow toward Billy Orr which Billy handled nicely, but over the head of Griggs, upon which Chet registered. From there on until the ninth not an Arbuckle man got farther than first base.

Yet even such a fundamental principle as the economic value of reserve power is not understood by one motorist in ten.

Some car owners take years to wake up to what it is costing them to compromise in the matter of power.

Why should a man have to wear out one compromise car after another before he learns that it costs more to operate such a car than a car of high reserve power?

The man who has been through it all knows that the very reason why the Packard is good for 75 miles an hour is the reason why 25 miles an hour day after day costs less from the Packard than from the car of lower power.

You call on it when you want it - and not unless you do want it.

The Packard Twin Six engine is a motor of live moving parts. Power is used only in moving the car-not in excess merely to keep the engine turning over.

The basic design of the Packard Twin Six motor has been wonderfully justified during the past few years of both peace and war work, so that any changes that may be made from time to time will be merely in the nature of refinements.

The Packard people are transportation experts. They have more to tell you on this subject than any other organization in the world. You can ask them to discuss your car problem without obligation. It is to your interest and profit to do so.

one—and a new star!

The new star is Kay Laurel—she of the lovely lines and the violet eyes, who first burst on the vision of New Yorkers as a Ziegfield Follies beauty, and who of late has been shining—more or less—in motion pictures. So many of our stage stars tiptoe into the drama via the pictures! A year ago Miss Laurel was just easing along as a chorus girl, doing the best she could, when Rex Beach saw her in her patriotic poses in the Follies. Mr. Beach was just then thinking about picturizing his story, "The Brand," and needed somebody to play the role of the dance hall girl. That's the way he discovered Ruby De Remer, who played in "The Auction Block." So Miss Laurel was introduced to Mr. Beach and was thrilled at the idea of pictures. She came West and played the part at the Goldwyn studio, and then did some parts in pictures for Lasky. However, she kot homesick for New York, and went back, and almost the minute she landed she was snapped up by A. H. Woods and a fountain pen placed in her dainty hand with which she was invited to sign her name to a plump contract under the terms of which she was to play the leading role in a new play entitled "A Pearl of Great Price."

of Great Price."

While the "pearl" is one of "great price." it is not doomed to "dark, unfathomed caves of ocean." In fact, quite to the contrary, this pearl comes entirely out of her shell. Miss Laurel, in one of the leading roles, is compelled by the exigencies of the drama to disrobe as completely as the New York censors will allow. Mr. Woods decided cannily to take no chances on the pole, but to find an actress upon whose charms the New York seal of approval had been set. Hence the engagement of Miss Laurel.

Has Oliver Morosco himself been again attacking his Desk Ford? In-other words, has the famous man-ager harked back to the days when he owned only one theater and written a play? At any rate a new play is in his possession, entitled "His Lady Friend," and the author's

BRILLIANT CHOPIN By Edwin Schaffert.

With Michelangelo clarity, Leo old Godowsky masterfully wrought and harmonic inspiration of Chopin programme last night at Trinity Auditorium. He dismi all extra arabesques and gingerbread decorations, and laid before his hear-ers his unsentimentalized version of the Polish genius. Godowsky's method of expressing

drously clear, that it leaves one almost aghast. His technique is all comprehensive. He measures the effect of every phrase, so that there is no doubt as to what it shall mean in the mind of the hearer. He can become as architectonic in his piling up masses of tone as it is possible to be, yet he never for a moment forgets that each separate integer of the structure must stand definite. Now, personally, I am not overfond of a totally unemotional view of such an artist as Chopin, but I will not believe that Godowsky is without feeling in reference to Chopin. It takes a moment or two to adjust yourself to the Godowsky ideal, but once he is on his way through the programme you detect his varying vibrations of feeling. It is intellectual in quality, but none the less vitally real.

Godowsky was dominatingly virile in his interpretations. Stern realities faced one in the Polonaise in Fisharp minor, that flery bit of carnage from the same head source from which springs the Revolutionary Etude, and the greater Scherzi. Another magnificently forceful episode was the finale of the Sonata in B minor. Even the Neckurne in kinglor seemed like a warrior in an elegiac mood. Brilliant, almost scintillant, was the Bolero. Then turn from these to the peace of the Largo in B minor, the lyric wanderings of the impromptu in Grat, and the Barcarolle. They were like getting into the soul of nature. For technical thrills and meaningful suggestion there were also the etudes. And still not mentioned are the mazurkas and waltzes revealing variety in ministure.

So Godowsky touches a wide range of expression in carrying out this ideal. He says what he himself feels in reference to Chopin and he says it vibrantly. He shakes all the faded blossoms off the tree of sentimentality while he is doing all this; if the brings down a few blooms besides. I for one have nothing to say against it.

# BRANDS SNYDER

Mayor Pounds Opponent for Harbor Mis-statements.

Unwarranted Attack Show His Ignorance.

Prove Lack of Fitness to Deal with Port."

Branding M. P. Snyder's state-ments regarding the harbor as false and unwarranted, Mayor Woodman yesterday issued the following re-ply to declarations made by his op-ponent regarding leases to corpora-tions:

restorday seased the following report to declarations made by his opponent regarding leases to corportions:

Will he admit that his statement in false?

Mr. Snyder also says: "At the close of the fiscal year of 1913, the ingome from the harbor was only \$2000 more than actual expenses."

Yet, if Mr. Snyder had szamined the reports of the harbor department, he would have ascertained that the revenues of the harbor for the fiscal year 1913 were \$252,-134,97, and the operation and maintenance amounted to \$154,752,01.

Hecause the bond fund was exhausted, the city had to take the net earnings of the harbor and put them into further improvements, and Mr. Snyder evidently is trying to make the public believe this is an operating expense.

The figures given do not include the \$190,000 advance rent from the Los Angeles Shipbuilding and Dry Dock Company, nor the great advantage to the city of the use of municipal pier No. 1 by the navy. The latter did not pay the harbor department any direct revenue whatever, but it is estimated that the expenditures of the navy men in Los Angeles amounted to about \$200,000 a month. The city, however, gladly allowed the navy to use this property to aid in winning the war. Would Mr. Snyder have done otherwise?

SEATILE FACTORS.

Bequuse of the wide interest in oil development and the record-breaking trading in oil stocks which has featured the market for several weeks and because a number of inquiries have been made of this department about the various companies whose securities just now are so largely in the public eye a brief summarization of the leading traders seems timely. It is pointed out in a recent review that "this is the age of oil. Petroleum has taken its place as one of the pillars of the world's ecohomic structure, All nations are turning to petroleum as the motive power of their ships. The world is hunting oil. The upward tendency of meritorious oil issues has by no means reached its apex."

The land holdings of this company are extensive and attractive and the whole enterprise is on a scale of magnitude and solidity which establish it as one of the productive giants of present day business.

UNION OIL—This stock reached its highest point for the year, thus far, on May 14, \$144.75. It is the firm belief of the well informed that the stock will go several points beyond this figure inside of thirty days. On a basis of earnings, intrinsic values and future possibilities many think Union is entitled to as high a price as that prevailing for California Standard Oil. Besides its proven territory and assured production drilling is going forward in Mexico where the company is recognized as one of the Big Three. The price of its stock has been steadily on the rise, albeit with an occasional setback due to surface conditions, and on May 14 reached a new high record at \$167. on the stock exchange today was marked by an absence of excitement and violent fluctuations. Dealings were comparatively moderate, falling considerably under the heavy Gally totals of last week.

The bond market participated to an unusual extent in the day's less apectacular operations, various domestic issues, notably low-priced speculative rails and several of the foreign flotations denoting a confident inquiry.

The one week extension of time granted to the German peace delegation evidentily exerted little influence as a market factor.

The above amount compares with \$10,146,000 for the first quarter of 1918. Assuming taxes at the same rate as in 1918, this 1919 showing would leave net earnings of about six times the dividend requirements for Debenture and Preferred stocks, including the present issue.

Net earnings after taxes for the last three years, if applied to the total amount (\$101,852,700) of Debenture and Preferred stock which it is proposed shall be outstanding, including the above issue, would have amounted to about \$23,00 per share annually.

On December 31, 1918, the net quick assets amounted to \$150,390,492, to which will be added the proceeds of the proposed issue of Debenture Stock. Nineteen Nineteen will establish some new records for retail trading in Los Angeles. Business is unprecedentedly good in almost every line. Some buyers are having trouble with stock shortage, but these are tradually being overcome as uneasiness over possible sudden price changes wears off. It is now pretty well understood that there will be no immediate or material change in level and orders are being placed in this confidence. This, in furn, enables the manufacturers to speed up production, and the whole retail fabric is being constantly strengthened. The tendency of the public to buy goods of the better frace, or goods formerly classed as luxuries continues, and even in the face of sustained clothing and shee prices there is no dimunition in the volume of trade in the better products in these divisions, while is bor-saving devices, electrical equipment, munical instruments and jewelly are moving freely. A point for the maychologists to pender over is in the fact that book sales do not appear to be keeping pace with the other lines. Of the making of books there is no end, but in this neck of the woods, at least, not so-many people are reading them.

Jaggers-Wallace Oil Company has increased the regular dividend and in addition will pay an extra 100% on June 1. Seems too good to be true, but we don't advertise any but good things. We have 2,000 shares for our clients at \$3.75. Money talks and we had the money, but they wouldn't sell us any more. Our clients who purchase stock now will share in all dividends. If you can beat your neighbors to the telegraph office you win. We predict \$25 for this stock. Send this message at our expense, not in a few minutes—BUT RIGHT NOW.

not be alarmed if the price of wheat is slightly increased from time to time to take care of carrying charges and to encourage both farmers and dealers to hold back a part of their crop in the country warehouses until it is needed by the mills. This will also prevent congestion at the terminals. In return for protection by the government against loss because of their shift in a prices, the mills will be required to give guarantees that the domestic consumer will be siven the advantage of a proportionately reduced price. The main point in all of which is that wheat and bread will be cheaper. Meats are already on a declining scale, although the consumer is not yet in full possession of the advantage, and other food commoddities are wavering. The statement of the control of the
